How the Pecasa system works

Pecasa consists of a few simple, but highly versatile components that can be combined in an infinite variety of ways. peca supplies a wall profile with a built-in cable duct, plus shelf supports, unit support brackets and metal shelves. You then arrange them however you like to create your own personalised furniture solution. You can even add lighting or a TV to your Pecasa system thanks to the cable duct in the side of the wall profile.

Flexible design

Thanks to its central wall profile, Pecasa is the last word in flexibility: its modular components can be moved into any position at any time, be they table tops, shelves, cabinets, or other items.

You are free to choose a symmetrical or an asymmetrical look, use the whole height of the profile or just part of it, or lay out your components in a centred or staggered alignment. The choice is yours!
